

PROFICIO'S 2014 ANNUAL IT SECURITY SURVEY

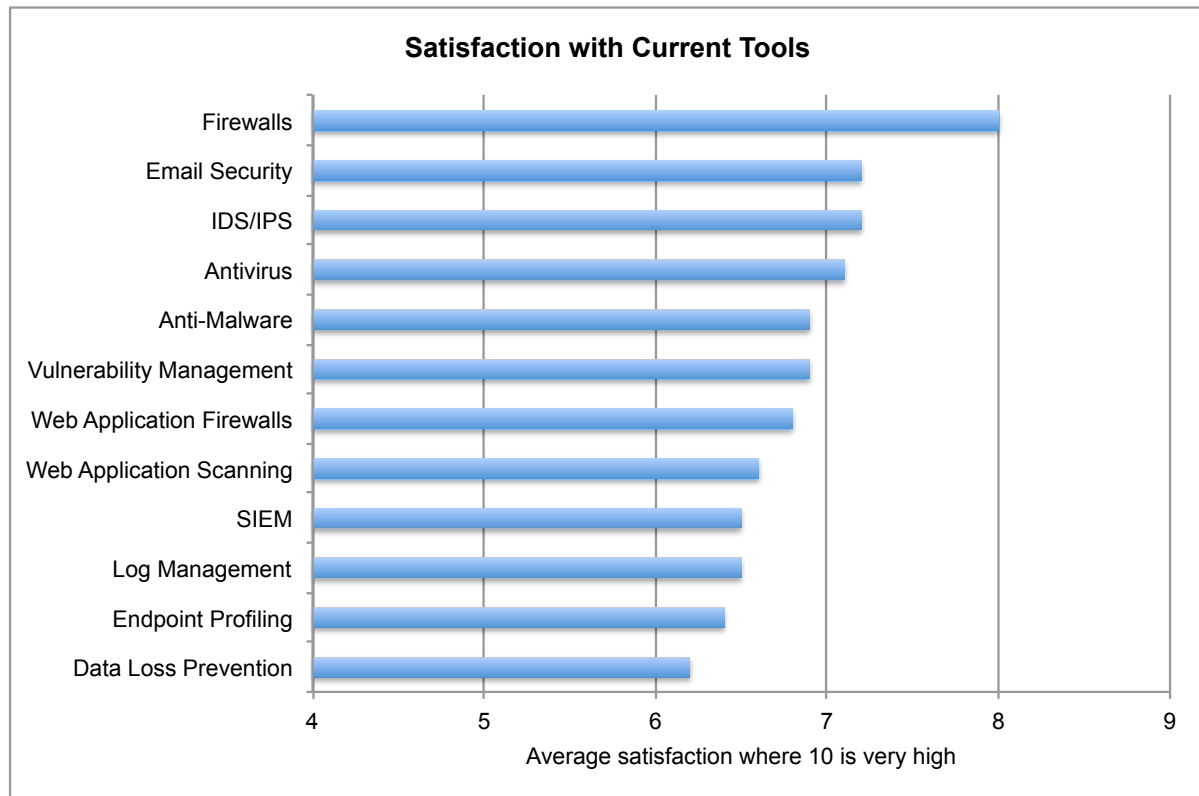

1. What are your biggest security concerns for 2014?

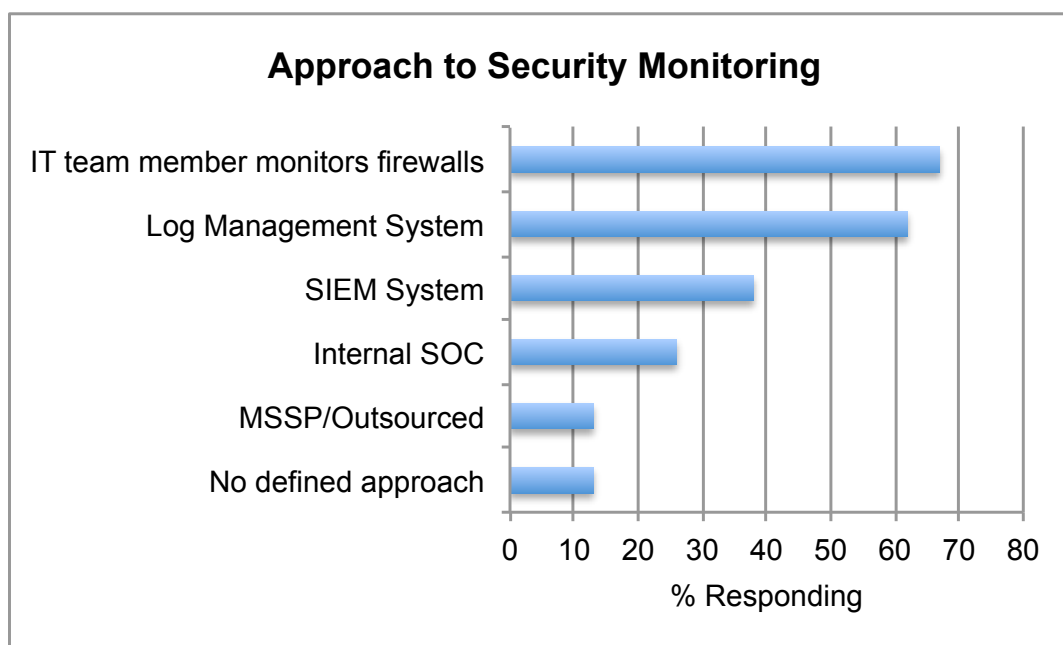

2. How many high-priority security events are never analyzed or resolved by your organization?

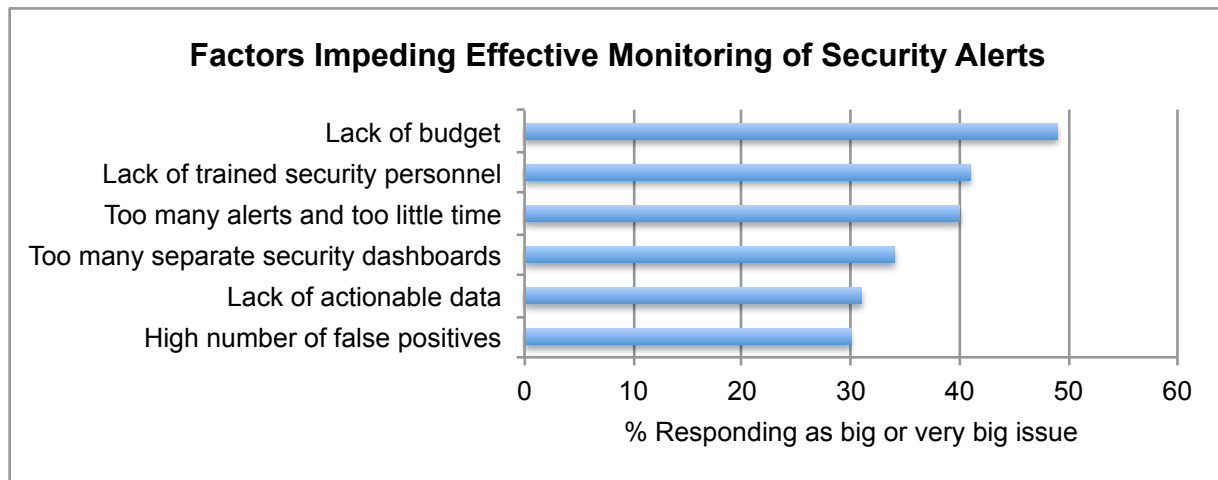

3. Are you satisfied with your current systems and tools to address the security issues you will face in 2014?

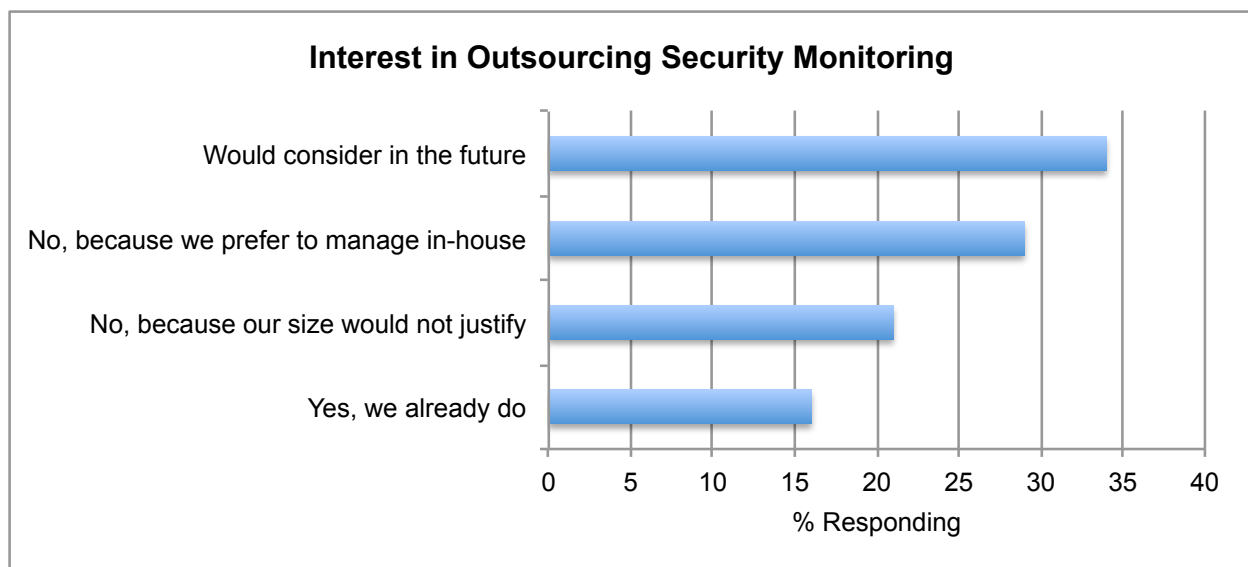

4. Which approaches does your organization take to monitor and resolve security alerts? (more than one answer was possible)

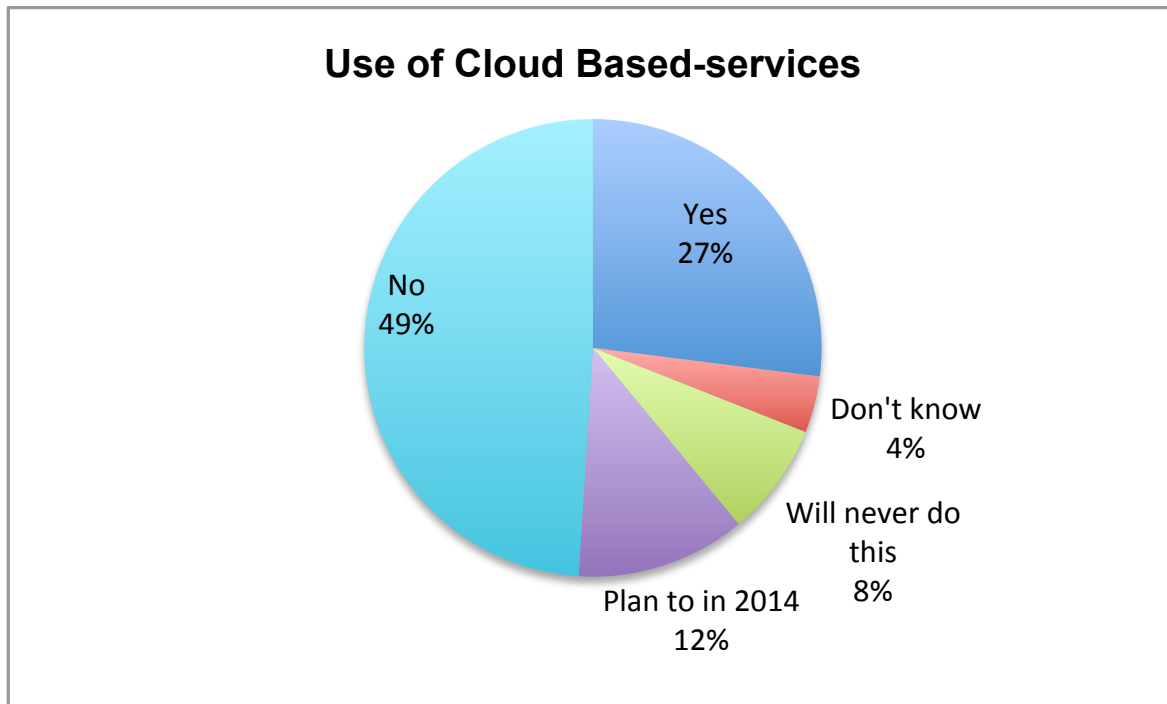

5. What factors get in the way of effective security event monitoring and response?

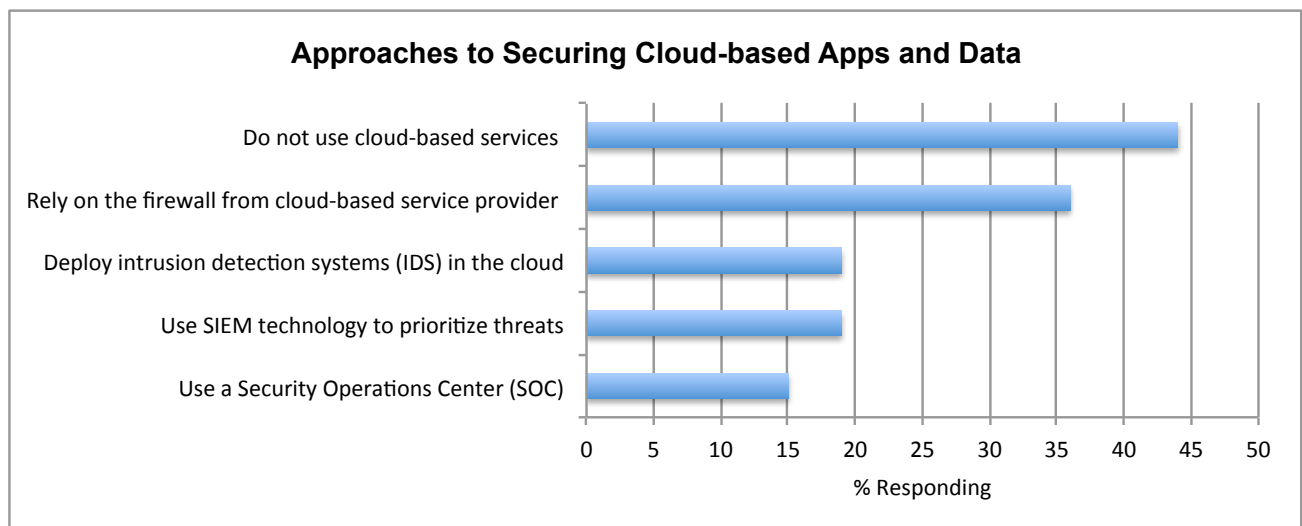

6. Would you consider outsourcing the function of collecting, monitoring and analyzing security events to a managed security service provider?

7. Do you use the services of cloud-based service providers, like Amazon Web Services (AWS) to store data or deploy applications?

8. How do you secure your data and/or applications residing in a cloud-based service provider's infrastructure?

SURVEY DEMOGRAPHICS

Based on survey data provided by over 140 large organizations from around the United States, this annual report was designed to give IT security professionals better insight into the challenges that they may face in 2014.

ABOUT PROFICIO

Proficio is a leading provider of next-generation managed security services. We are changing the way organizations meet their IT security and compliance goals by providing the most advanced cloud-based solutions to monitor and scan critical assets without the need for added headcount or costly software and hardware systems.

Proficio's ProSOC is a Security Operations Center (SOC) subscription service that logs, monitors and analyzes organizations' security events. Staffed 24x7 by security experts and using industry leading SIEM technology, ProSOC helps organizations address critical security and compliance needs, minimize business risk, and reduce costs. Proficio's ProSCAN is a cloud-based service including vulnerability management, automated asset discovery, web application scanning, malware detection, policy and compliance controls, and PCI scanning.

Our customers value our insight, experience and unrelenting passion for defending their networks and applications from cyber attacks.
